# hotspot review

**“Hotspot offers a really easy and affordable tool for measuring a players ability to perform a specific task. It is really quick to setup and can be easily manipulated by changing the start settings and the timing modes making it a great way to benchmark a squad on any given functional drill or practice.**

**I like how simple the kit is and the fact that it has the potential to be used across a range of departments in the club including the sports science and medical departments at both first team and academy level.”**

**Mark Howard, Head of Fitness  
Blackburn Rovers FC**

**“The Hotspot is a truly revolutionary piece of training equipment. The system adds another dimension to the proven Spanish footwork drills and movement patterns. Any coach who is serious about sport should have Hotspot in their equipment.”**

**Yves Latreille, Technical Director  
Registro Profesional de Tenis**
